1. Introduction

This report is a detailed look into the job market for the role of Marketing Data Analyst. The goal of this research is to understand what employers around the world are looking for in this role, and to compare what Pakistani companies expect versus what foreign companies demand.

The Marketing Data Analyst role was chosen because it sits at the intersection of two important fields: marketing and data. In today's world, every business decision is driven by data. Marketing teams can no longer rely on guesswork. They need people who can read the numbers, spot patterns, and turn raw data into useful business insights. This makes the Marketing Data Analyst one of the most in-demand roles in the job market today.

To carry out this research, 20 real job descriptions were studied from 10 Pakistani companies and 10 foreign companies based in the USA, UAE, and Netherlands. The skills, tools, and experience levels that each company asked for were analyzed. Each skill or tool was counted based on how many times it appeared across all 20 job posts. The findings from this data have been organized into charts, a full dashboard, and the sections below.

2. Company Overview

The table below lists all 20 companies that were studied for this project. The first 10 are Pakistani companies, and the remaining 10 are from foreign markets.

#	Company Name	Country	Sector / Industry	Job Title
1	Finz Games	Pakistan	Gaming / Tech	Marketing Analyst Intern
2	Contour Software	Pakistan	Software	Digital Marketing Analyst
3	TalentHue	Pakistan	HR / Recruitment	Marketing Data Analyst
4	Crossing Hurdles	Pakistan	Research / Consulting	Marketing Research Analyst
5	Royal Fans	Pakistan	Manufacturing	Market Analyst Manager
6	Sysridge Technologies	Pakistan	IT Services	Marketing Analyst

#	Company Name	Country	Sector / Industry	Job Title
7	Software Finder Careers	Pakistan	Tech / SaaS	Market Research Analyst
8	CureMD Healthcare	Pakistan	Healthcare IT	Associate Marketing Analyst
9	EWS Group	Pakistan	Digital Marketing	PPC & Digital Marketing Analyst
10	Silverlight Research Group	Pakistan	Market Research	Market Research Analyst
11	AlgoDriven	UAE	AI / Analytics	Market Analyst
12	Insight Global	USA	Staffing / Analytics	Associate Marketing Analyst
13	Kraft Heinz	USA	FMCG	Marketing Analyst
14	Google	USA	Technology	Marketing Analyst
15	LHH	Netherlands	HR / Consulting	Marketing Reporting Analyst
16	Wawa Inc.	USA	Retail / Convenience	Loyalty Marketing Analyst
17	Ahold Delhaize USA	USA	Retail / FMCG	Marketing Analyst
18	Speak	USA	EdTech / SaaS	Marketing Analyst
19	iHerb	USA	E-commerce / Health	Marketing Analyst CRM Retention
20	DEMAND.com	USA	Digital Marketing	Marketing Analyst

3. Job Description Analysis

The following table shows the key information taken from each job description. It lists the job title, required experience level, and the main tools asked for by each company.

#	Company Name	Country	Job Title	Technical Skills	Soft Skills	Tools	Experience
1	Finz Games	Pakistan	Marketin	Digital	Communication	Excel,	Internship

#	Company Name	Country	Job Title	Technical Skills	Soft Skills	Tools	Experience
			g Analyst Intern	Marketing, Keyword Research, Data Analysis	, Teamwork, Analytical Thinking	Google Sheets, Google Ads, Meta Ads	
2	Contour Software	Pakistan	Digital Marketing Analyst	PPC, Campaign Optimization, Data Analysis	Project Management, Communication, Attention to Detail	Excel, Google Ads	1-2 Years
3	TalentHue	Pakistan	Marketing Data Analyst	Data Analytics, Marketing Analytics, Customer Analytics	Attention to Detail, Strategic Thinking, Communication	Excel, Adobe Analytics, Google Analytics, Tableau, Looker, Domo, SQL, Python, R	3-5 Years
4	Crossing Hurdles	Pakistan	Marketing Research Analyst	Market Research, Competitive Analysis, Web Analytics	Communication, Collaboration, Presentation	Analytics Tools	1-2 Years
5	Royal Fans	Pakistan	Market Analyst Manager	Market Research, Competitive Analysis, Survey Analysis	Leadership, Strategic Thinking, Project Management	Excel, Power BI	5+ Years

#	Company Name	Country	Job Title	Technical Skills	Soft Skills	Tools	Experience
6	Sysridge Technologies	Pakistan	Marketing Analyst	Campaign Analysis, Digital Marketing, Data Analysis	Collaboration, Proactive, Attention to Detail	Marketing Automation, Social Media Analytics, Video Editing	1-2 Years
7	Software Finder Careers	Pakistan	Market Research Analyst	Market Research, Market Segmentation, Trend Analysis	Problem Solving, Collaboration, Attention to Detail	Excel	2-4 Years
8	CureMD Healthcare	Pakistan	Associate Marketing Analyst	Market Research, Content Strategy, KPI Analysis	Communication, Collaboration, Attention to Detail	Google Analytics, AI Tools	0-1 Years
9	EWS Group	Pakistan	PPC & Digital Marketing Analyst	PPC, Campaign Optimization, Performance Analytics	Problem Solving, Analytical Thinking, Client Focus	Excel, Google Ads, Meta Ads	1-2 Years
10	Silverlight Research Group	Pakistan	Market Research Analyst	Talent Sourcing, Screening, Research	Proactive, Attention to Detail, Collaboration	LinkedIn	Internship
11	AlgoDriven	UAE	Market Analyst	Market Research, Data Management, Forecasting	Communication, Attention to Detail, Analytical Thinking	Excel, Google Sheets, BI Tools	1-2 Years

#	Company Name	Country	Job Title	Technical Skills	Soft Skills	Tools	Experience
12	Insight Global	USA	Associate Marketing Analyst	SQL, Predictive Modeling, Data Visualization	Communication, Presentation, Stakeholder Management	SQL, Tableau, Google Sheets, Python, Marketo	1-3 Years
13	Kraft Heinz	USA	Marketing Analyst	Market Analytics, Sales Analytics, Competitive Analysis	Attention to Detail, Communication, Organization	Nielsen, IRI, Circana, Excel, PowerPoint	1-2 Years
14	Google	USA	Marketing Analyst	Statistics, Marketing Analytics, Predictive Modeling	Communication, Influencing, Project Management	SQL, Python, R, Hadoop, Dashboard Tools	3-5 Years
15	LHH	Netherlands	Marketing Reporting Analyst	Business Intelligence, Digital Analytics, Data Visualization	Attention to Detail, Time Management, Collaboration	Google Analytics, Power BI, Tableau, Domo	2-4 Years
16	Wawa Inc.	USA	Loyalty Marketing Analyst	Statistics, Customer Analytics, Data Integration	Communication, Independence, Conflict Resolution	Excel, Word, PowerPoint, SQL, Tableau	5+ Years
17	Ahold Delhaize USA	USA	Marketing Analyst	Statistics, Experimental Design, Marketing	Collaboration, Time Management, Curiosity	Google Analytics, Adobe Analytics,	2-4 Years

#	Company Name	Country	Job Title	Technical Skills	Soft Skills	Tools	Experience
				Analytics		BigQuery, Looker Studio, Power BI, Tableau	
18	Speak	USA	Marketing Analyst	Predictive Modeling, Experimental Design, Statistics	Leadership Communication, Collaboration, Insight Generation	SQL, Python, Amplitude, Mode	3-5 Years
19	iHerb	USA	Marketing Analyst CRM Retention	Customer Analytics, Predictive Modeling, CRM Analytics	Communication, Attention to Detail, Proactive	SQL, Excel, Google Sheets, Tableau, Power BI, Looker, Google Analytics, Python, R	3-5 Years
20	DEMAND.com	USA	Marketing Analyst	Data Analysis, Forecasting, Market Research	Attention to Detail, Time Management, Adaptability	Excel, Google Sheets	1-2 Years

4. Skills and Tools Analysis

4.1 Technical Skills Demanded

The table below shows the top 10 technical skills mentioned across all 20 job posts. Market Research appeared the most, in 6 out of 20 job descriptions, followed closely by Data Analysis, Predictive Modeling, and Statistics, each appearing 4 times.

Technical Skill	Mentions	% of 20 JDs
Market Research	6	30%
Data Analysis	4	20%
Predictive Modeling	4	20%
Statistics	4	20%
Marketing Analytics	3	15%
Customer Analytics	3	15%
Competitive Analysis	3	15%
Digital Marketing	2	10%
PPC (Pay Per Click)	2	10%
Campaign Optimization	2	10%

The data shows that Pakistani companies focus more on Market Research and Digital Marketing skills, while foreign companies place greater weight on Statistics, Predictive Modeling, and Experimental Design. This shows that foreign employers expect a higher level of technical and analytical thinking.

4.2 Soft Skills Demanded

Soft skills are just as important as technical ones. The table below shows the top 10 soft skills mentioned across all 20 job descriptions. Communication and Attention to Detail both appeared in 11 out of 20 job posts, making them the most sought-after soft skills in this field.

Soft Skill	Mentions	% of 20 JDs
Communication	11	55%
Attention to Detail	11	55%
Collaboration	8	40%

Soft Skill	Mentions	% of 20 JDs
Analytical Thinking	3	15%
Project Management	3	15%
Proactive	3	15%
Time Management	3	15%
Strategic Thinking	2	10%
Presentation	2	10%
Problem Solving	2	10%

Both Pakistani and foreign companies strongly agree on the top soft skills. Communication, Attention to Detail, and Collaboration were ranked top across both markets. This shows that no matter where you work, these three qualities are essential for a Marketing Data Analyst.

4.3 Tools and Software Demanded

The table below shows the top 10 tools and software applications mentioned across all 20 job descriptions. Excel was the most in-demand tool, appearing in 11 out of 20 posts, followed by Tableau and SQL at 6 mentions each. Google Sheets, Google Analytics, and Python all appeared in 5 job descriptions each.

Tool / Software	Mentions	% of 20 JDs
Excel	11	55%
Tableau	6	30%
SQL	6	30%
Google Sheets	5	25%
Google Analytics	5	25%
Python	5	25%
Power BI	4	20%

Tool / Software	Mentions	% of 20 JDs
Google Ads	3	15%
R	3	15%
Adobe Analytics	2	10%

A key difference was observed between Pakistani and foreign companies. Pakistani employers primarily asked for Excel, Google Ads, Meta Ads, and basic analytics tools. Foreign companies required more advanced tools like SQL, Python, Tableau, Power BI, and specialized platforms like Adobe Analytics, BigQuery, and Looker. This suggests that foreign markets expect analysts who can handle more complex data work.

4.4 Key Differences: Pakistani vs Foreign Companies

There are clear differences between what Pakistani companies and foreign companies want from a Marketing Data Analyst:

- Pakistani companies lean toward digital marketing tasks. They ask for skills like PPC, campaign optimization, and social media analytics.
- Foreign companies ask for stronger data and statistical skills. Tools like Python, R, SQL, Tableau, and advanced dashboards are much more common in foreign job posts.
- Experience requirements are generally lower in Pakistani companies, with most roles asking for 1 to 2 years or internship-level experience. Foreign companies often ask for 3 to 5 years.
- Foreign companies use more specialized platforms. Names like BigQuery, Amplitude, Looker Studio, and Mode appeared only in foreign job descriptions.
- Both markets agree strongly on soft skills. Communication, Attention to Detail, and Collaboration were important to both Pakistani and foreign employers.

5. Dashboard and Visual Charts

The dashboard below was created using Python and covers 8 different views of the data collected from all 20 job descriptions. Each chart tells a different part of the story.

Chart 1 (Top Left) shows the Top 10 Overall Demanded Skills and Tools. Communication, Attention to Detail, and Excel are the top three, each mentioned 11 times out of 20.

Chart 2 (Top Center) is a Donut Chart showing the split between Technical and Soft attributes. About 69.4% of all mentions were for technical skills and tools, while 30.6% were for soft skills. This shows that while technical knowledge is more important in volume, soft skills still make up a large portion of what employers want.

Chart 3 (Top Right) compares Pakistani and foreign companies for the top 6 overall skills. It shows that both groups value Communication and Attention to Detail equally. However, foreign companies ask for Excel and SQL more often.

Chart 4 (Middle Left) shows the Top Core Technical Framework Demands. Market Research is the most asked-for technical skill, followed by Data Analysis, Predictive Modeling, and Statistics.

Chart 5 (Middle Center) shows Software and Platform Demand by Category. Spreadsheet tools like Excel and Google Sheets dominate, followed by BI and Data Visualization tools like Tableau and Power BI.

Chart 6 (Middle Right) focuses on Soft Skills. Communication and Attention to Detail are far ahead of all others, with Collaboration in third place.

Chart 7 (Bottom Left) shows the distribution of Experience Seniority Levels. Most job posts asked for 1 to 2 years of experience. Only a few asked for internship-level or 5 or more years.

Chart 8 (Bottom Right) is a Word Cloud made from all the skill and tool names. The largest words are those that appeared most often. Communication, Analytics, Attention, Detail, and Analysis are the biggest, confirming the findings from the other charts.

Figure 5: Pakistani vs Foreign Comparison

Figure 6: Experience Level Distribution

Figure 7: Additional Analysis Chart

Figure 8: Word Cloud of Skills and Tools

Figure 9: Summary Overview

6. Key Findings

6.1 Top 5 Technical Skills Demanded

- Market Research (mentioned in 6 out of 20 JDs, or 30%)
- Data Analysis (mentioned in 4 out of 20 JDs, or 20%)
- Predictive Modeling (mentioned in 4 out of 20 JDs, or 20%)
- Statistics (mentioned in 4 out of 20 JDs, or 20%)
- Marketing Analytics and Customer Analytics (3 out of 20 JDs each, or 15%)

6.2 Top 3 Soft Skills Demanded

- Communication (mentioned in 11 out of 20 JDs, or 55%)
- Attention to Detail (mentioned in 11 out of 20 JDs, or 55%)
- Collaboration (mentioned in 8 out of 20 JDs, or 40%)

6.3 Most Common Tools and Software

- Excel (11 mentions, 55% of all JDs) is the single most demanded tool across both markets
- Tableau and SQL are tied at 6 mentions (30%) each
- Google Analytics, Google Sheets, and Python all appeared in 5 JDs (25%) each
- Power BI appeared in 4 JDs (20%), making it the fourth most common BI tool

6.4 Pakistani vs Foreign Requirements Comparison

- Pakistani companies focus on digital marketing and campaign analysis skills, while foreign companies demand statistical modeling and data engineering skills
- Foreign companies require more advanced platforms like Python, R, BigQuery, Looker Studio, and Hadoop, which are rarely seen in Pakistani job posts
- Experience required is generally lower in Pakistan (mostly 1 to 2 years) compared to foreign companies (mostly 3 to 5 years)
- Both markets place equal weight on soft skills like Communication, Attention to Detail, and Collaboration

7. Personal Reflection and Skill Gap Analysis

After going through all 20 job descriptions and looking at the results, a clear picture emerges of where I currently stand and where I need to grow. This section is an honest look at my own skills compared to what the market is asking for.

At the moment, I am comfortable with Excel and basic data work. I have learned about charts, formulas, and simple data tables through this course. I also have a basic understanding of Google Analytics and how digital marketing works. In terms of soft skills, I believe I have decent communication skills and I try to be detail-oriented in my work.

However, when looking at what the job market is actually asking for, especially in foreign companies, there is a clear gap. I do not yet know SQL, which appeared in 30% of all job descriptions. I have not learned Python or R, which are needed in many analyst roles, especially abroad. Tableau was also mentioned in 30% of job posts, and while I have seen it in class, I am not yet confident using it on my own.

What stood out the most was how often Statistics and Predictive Modeling appeared in foreign job descriptions. This shows that to compete in international markets, one needs to go beyond basic analysis and learn how to build models and run experiments with data.

My learning plan going forward is to start with SQL, since it is the most practical and job-ready skill that can be learned quickly. I plan to complete a free SQL course on platforms like Khan Academy or Mode Analytics within the next 3 months. After that, I want to learn the basics of Python for data analysis using Pandas and Matplotlib over the following 3 months. At the same time, I plan to build Tableau skills by creating dashboards using public datasets and posting them on Tableau Public.

I also plan to update my LinkedIn profile with the skills I already have and start connecting with professionals working in analytics roles. This project has given me a clear map of where I need to go, and I now feel more motivated to start building these skills one step at a time.

8. Conclusion

This project provided a close look at the real world of Marketing Data Analyst jobs. By studying 20 actual job descriptions from companies in Pakistan, the USA, UAE, and Netherlands, a clear pattern emerged in what employers want. Excel, Communication, Attention to Detail, and SQL

are the foundation that every analyst needs. Foreign companies push further into statistics and programming, while Pakistani companies focus more on digital marketing skills.

The dashboard and charts created in this project make the data easy to understand at a glance. The findings show that the Marketing Data Analyst role is in strong demand globally, with most roles asking for 1 to 3 years of experience. The skill gap between current abilities and what the market wants is clear, but it is also something that can be closed with focused effort over the next year. This project has been a very useful step in planning a professional future in data analytics.
